EDUCATION

Korea University, College of Global Business (Sejong Campus) Mar 2023 – Feb 2028 (expected)
Bachelor of Business Administration (B.B.A.), Digital Business Management, Division of Convergence Business · GPA 3.79/4.50
Undergraduate research with Prof. Hyungu Kahng (Department of Digital Management)
Research focus: large language models, vision models, and reinforcement learning
Honors: Top Honors Student, Certificate of Commendation (Jan 2025)

RESEARCH INTERESTS

Aligning and evaluating AI systems, focusing on the behavioral evaluation of large language models (e.g., cross-linguistic consistency and controllability), vision-language models, and reinforcement learning.
Research Areas: AI & LLM Alignment · Behavioral Evaluation of LLMs · Vision-Language Models (VLMs) · Reinforcement Learning

RESEARCH EXPERIENCE

Cross-Linguistic Moral Preferences in Large Language Models: Evidence from Distributive Justice Scenarios and Domain Persona Interventions 2025
First Author · Published in *Electronics* (MDPI), Dec 2025 · Poster, KDMS Fall Conference 2025

- Evaluated Gemini 2.0 Flash in English and Korean across six behavioral-economics distributive justice scenarios, generating over 1.2 million observations.
- Found substantial language-dependent divergences, including gaps of up to 56 percentage points and complete preference reversals, paralleling the human foreign-language effect in moral psychology.
- Showed that domain-specific personas from normative disciplines (sociology, economics, law, philosophy, history) reduce cross-linguistic gaps by 62.7% on average.
- Proposed a compensatory integration framework for multilingual LLM deployment and cross-linguistic consistency as an AI alignment metric.

Controlling Informational Freedom in Large Language Models via Degree of Freedom Prompting Aug 2025
Co-author · Korean Data Mining Society (KDMS) Summer Conference 2025 · Best Paper Award

- Contributed to a study on controlling how much informational freedom an LLM exercises in its outputs through degree-of-freedom prompting; presented as a poster and awarded Best Paper.

Comparative Analysis of Medical LLMs for Clinical Text Summarization Using the MeQSum Dataset Sep 2024 – Jan 2025
Undergraduate Researcher, Korea University · with Prof. Hyungu Kahng

- Evaluated and compared LLMs on summarizing complex clinical texts and medical inquiries using the MeQSum dataset.
- Applied AlignScore for fact-based assessment of generated summaries, analyzing alignment and hallucination rates of text generation models in the healthcare domain.

Facial Video Analysis System for Emotion Recognition and Suicide Risk Detection Jul 2023 – Dec 2023
Undergraduate Researcher, Korea University · with Prof. Chul Han (Department of Electronics and Information Engineering)

- Developed an algorithm that extracts emotional states and early signs of suicide risk from facial video data.
- Built an early-detection model designed to identify at-risk individuals at an early stage and support timely mental-health intervention.

Growth Image Data Utilization for Vertical Farm AI Control Systems Sep 2023 – Dec 2023
Researcher · 2023 Future Strategy Startup Support Program, Korea Invention Promotion Association (KIPA)

- Developed methods for applying crop growth image data to AI-based vertical farm control systems.

Object Detection in CCTV Videos Using Supervised Learning and Federated Learning
Sep 2023 – Dec 2023
Creative Undergraduate Research Training Program (CURT), Korea University

- Built CCTV object detection models in Python with supervised and federated learning.

HONORS & AWARDS

Best Paper Award, Korean Data Mining Society (KDMS) Summer Conference Aug 2025
Controlling Informational Freedom in Large Language Models via Degree of Freedom Prompting

Top Honors Student (Certificate of Commendation), Korea University (Sejong Campus) Jan 2025
For outstanding academic performance and exemplary conduct

Excellence Award, Korea University Center for Industry-Academia Education Dec 2024
Industry–academia PBL project with Farmkit: e-commerce strategy and TableOCR-integrated food chatbot

Top Excellence Award, Korea University Sejong Institute for Educational Innovation Dec 2024
KUS-TUDY Program: Business Data Analytics Using Python

Top Excellence Award, 2024 Sejong City Corporate Analysis Competition Oct 2024
Corporate analysis of Seobuk Co., Ltd. · Korea University Center for Sejong Career Development

Excellence Award, 2024 Youth Work Experience Program Sep 2024
Farmkit internship project · Korea University Sejong Research and Business Foundation

Silver Award, Essay Contest, Korea University Center for Industry-Academia Education Jul 2024
Becoming a Developer Who Creates a Positive Impact Through Data Analysis and AI

Grand Prize & Outstanding Mentor Award, T-SUM Data Analysis & AI Competition Jun 2024
Object detection AI using e-scooter driving footage · KU Center for Industry-Academia Education

Excellence Award, Korea University Sejong Center for Entrepreneurship Education Dec 2023
Branding project featuring the JOOINJANG character

Bronze Award, Chungcheong ICT Innovation Square Intermediate AI Course Nov 2023
Computer vision AI for detecting emergencies and critical patients in CCTV footage

Course titles translated from the Korean transcript; † English-medium course.

INDUSTRY EXPERIENCE

AI Developer Intern, Farmkit Co., Ltd. (Sejong) Jul 2024 – Dec 2024

- Built a TableOCR-integrated food chatbot process, with food data mining and labeling algorithms.
- Developed e-commerce strategies; the work received two Excellence Awards.

Chief Technology Officer, JOOINJANG (character brand, Seoul) Sep 2023 – Dec 2025

- Registered and grew the character brand, managing branding, merchandise, and commercialization.
- Placed merchandise in Shinsegae, Hyundai, and Lotte department stores, exhibited at 11 illustration fairs (e.g., COEX, KINTEX), and led social-impact collaborations with ChildFund Korea.

SOFTWARE PROJECTS

Official Web Platform for the 38th Student Council, Korea University (Sejong Campus) Jan 2026 – Present

Live service: kus-student-council-38th.co.kr · absorbed the earlier KUS-BUS service (2024–2026)

- Built and operate the council website with a custom CMS and admin dashboard, plus governance modules for meeting minutes, bylaws, pledges, archives, and an inquiry system.
- Carried over KUS-BUS: a real-time shuttle countdown from official timetables and a Python/BeautifulSoup scraper that refreshes cafeteria menus weekly via an API endpoint.
- Implemented an automated reservation system for meeting rooms in the Student Union building.

LEADERSHIP & SERVICE

Vice President, 38th Student Council, Korea University (Sejong Campus) Dec 2025 – Present

- Negotiate with the university on student welfare; student representative on tuition fee review.
- Chaired the Budget and Accounts Special Committee and the 2027 Freshman Orientation Committee.
- Led planning for the 2026 Freshman Orientation and Festival, and the Facilities Task Force.

CERTIFICATIONS

Deep Reinforcement Learning Course, Certificate of Excellence, Hugging Face Aug 2026

SQL Developer (SQLD), Korea Data Agency (K-DATA) Mar 2024

Advanced Data Analytics Semi-Professional (ADsP), Korea Data Agency (K-DATA) Sep 2023

TECHNICAL SKILLS

- **Programming & data:** Python, JavaScript, SQL, BeautifulSoup, web scraping, pipeline automation
- **Machine learning & NLP:** LLMs, LLM evaluation (AlignScore), persona prompting, RL
- **Computer vision:** object detection, facial expression recognition, OCR, federated learning
- **Engineering:** full-stack web development, CMS, system architecture, Heroku, Cloudflare DNS
